## CARBON POLES

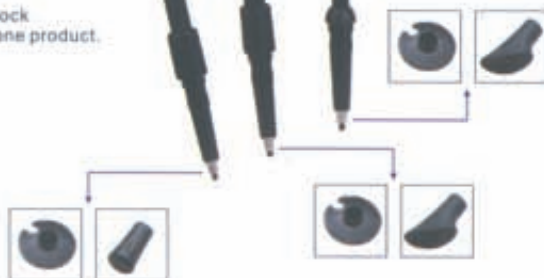

- 1 Expander Stop(Nyloc nut)
- 2 Brass bush
- 3 Expander(Nylon)
- 4 Anodized aluminum Pin

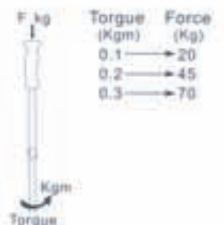

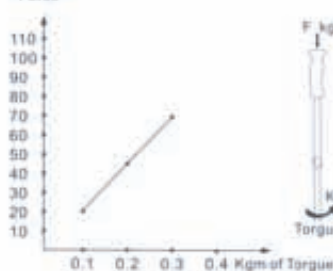

The blocking system ensures reliable performance even in extreme conditions. The expander makes sure that the telescopic sections hold firm at the adjusted length. This one-piece expander is securely fastened to the poles so it can't get loose when sections get pulled apart. This system is easy for replacement of all the components.

**ANTISHOCK ON/OFF SYSTEM**  
The ON/OFF mechanism enables the user to turn the antishock feature on or off. It combines the benefits of both, an antishock and a rigid telescopic pole in one product.
